

STOMYSENS – The formula

LACTOFERRIN

✓ Based on **microRepair® (Carbonate-Hydroxyapatite-Zinc-Substituted)**

✓ Enriched with **Zinc PCA and Lactoferrin**

STOMYSENS

- Triple action -

DESENSITIZE

REMINERALIZE

PROTECT

DESENSITIZE

microRepair[®], thanks to their dimension and composition, penetrate deeply in dentinal tubules and bind to the surface of dentine in a biomimetic way. Applied on tooth stumps, STOMYSENS penetrates into the dentine and provides a desensitizing action.

STOMYSENS

- Triple action-

DESENSITIZE

REMINERALIZE

PROTECT

REMINERALIZE

microRepair® repair the tooth enamel through the formation of a biological protective cover; microRepair® are, therefore, able to recreate the human teeth structure.

STOMYSENS

- Triple action -

DESENSITIZE

REMINERALIZE

PROTECT

PROTECT

microRepair® conduct an efficient and long-lasting antiseptic action: through the biomimetic layer, the tooth is protected from the attack of acids and bacteria.

STOMYSENS – NEW FORMAT

DESENSITIZING REPAIRING TREATMENT

It is indicated for hypersensitivity treatment on the exposed dentine and for desensitizing and protective treatment of tooth stumps, which are healthy to be rehabilitated with a fixed prosthesis.

NEW FORMAT 1 bottle of 4ml size
+ 10 little brushes
